

4 Ways to End Parkinson's Disease

- Parkinson's is the fastest growing neurological disease in the world.
- There is no known cause and no cure.
- Canada has the highest per capita rate of diagnosis.

This summer, three teams of people living with Parkinson's, will cycle over 10,000 kms across Canada, visiting all provinces, two territories and three coasts in 60 days.

The Spinning Wheels Relay To End Parkinson's, will reach those living in isolation, raise awareness, and generate funds to end Parkinson's Disease. The relay will end with all teams arriving in Ottawa for a Celebration on Parliament Hill.

To make this momentous task a success, we need your help,

1. **Join our Pixel Project** – pledge \$50 to have a picture of you or your family added to our team flags. The flags will be raised on all 3 coasts, passed at each provincial border and flown at a celebration on Parliament Hill. [Pledge Now](#)
2. **Make a charitable donation** – all amounts of \$25 or more will receive a charitable receipt. Every \$25 = 1km. Help us reach 10,000kms. [Donate Today](#)
3. **Sponsor the Ride** – enjoy the cross-country perks of being an event sponsor at any one of six sponsorship levels. [Be a Sponsor](#)
4. **Make a donation in kind** - Gas, Hotels, Food/Grocery Gift cards, Rental Vehicles, Bike Parts, would all greatly support the ride. [Be Kind](#)

Together we can end Parkinson's Disease
